

NISSAN FIGARO COLOURS

The Figaro was produced in 4 main body colours and the colour code is stamped on the VIN plate attached to the bulkhead. It is important to note that this isn't the paint code for the car and will be meaningless to many body-shops repairing Figaro's!! An emerald Figaro will be coded 6K8 but this simply means that this is a two-tone car in emerald / white.

The corresponding paint code – meaningful to body-shops etc is shown in the table below, so the paint code for emerald is JK2.

Body Colour	Nissan Composite Code	Actual Paint Colour
EMERALD GREEN	8K8	JK2
PALE AQUA BLUE	6K9	DH5
LAPIS GREY	7K0	WK4
TOPAZ MIST	7K1	EH0
WHITE (Roof, Mirror backs, Wheel trims)	N/A	WK3
Interior IVORY (Dash, Speaker Panels etc)	N/A	N/A Mix to W120/Y2/B3/R0.5
Convertible Hood Frame (Yellow paint)	N/A	B0552 or Motip 943282
Rocker Cover (Red paint)	N/A	Hycote - Engine Enamel Gloss Red Aerosol spray paint

Many Figaro's have been **custom painted** so if you own such a vehicle – keep a note of the paint code. This will make life a lot easier if the car needs to be repaired in future.

After many years weathering – the colour of your Figaro may well have changed – lapis cars, for example, can vary from a slate grey to an almost purple colour. A good bodyshop will blend new paintwork so that the demarcation between old and new isn't obvious. There are also specialists who will tint paint for an exact match – usually the petrol filler flap is sent off for matching.

For touching up with paint pens, aerosols or base coats, it is best to have the paint computer colour matched to the actual car.
